

The Rusach Advantages

Factory Automation

Factory Automation using **Rotary Tables & Pallet Automation** is what we Specialize in. Part Shuttling/Storage/Transfer or Rotary Tables for Inspection, Assembly, Testing & Machining operations, **Rusach International** has the capabilities to work directly for you or in collaboration with other Automation Professionals as a group project.

Our engineering department has the background, training and experience you need.

Rotary Tables

* **Add a Forth and or Fifth axis** to your machining capabilities.

* **Save on Set-up Time** * **Extremely Accurate Positioning (+/- 1 Arc Second)** * **Machining, Inspecting, Testing & Assembly applications**

Pallet Automation

* **Specialist for large parts, heavy parts and large machines**, can do small ones also!

* Rusach Systems work with **any brand or model of machine**.

* Rusach Systems work with **any combination of machines**. i.e. VTL, Horizontal etc.

* **Any layout Possible** * **Plenty of room for operator** * **Heavy Duty design**

* **Front or Side Load** * **Expandable in future** * **Chain Drive** * **Safety Features**

* **Any number of Pallets** * **Self Cleaning with Wipers** * **Chip/Coolant Tray**

* Rusach units are **self contained** and have their own Power System, Hydraulic System and Air System. A discrete interface will be added to the machine.

* **3 Modes**—Full Manual, Semi Automatic and Full Automatic for Lights Out Operation.

* **Pallets are Mechanically Clamped**
They will not Move!

* Locating pins are all Hardened & Ground and **Mastered!**

* **Controller to Handle Pallet System**

* **Hardened & Ground Pallet Supports**

* Designed & Engineered **per your Application!**

* **Options** include Door Automation, Paint Color, Walkways, Fencing & Guards, Chip Conveyors, Fixturing, Clamping & Work Holding, Robotics, Pallet and or Part identification, Orientation Stations, Setup Stations, Inspection Stations, Pallet Storage Systems, Pallet Transfer Systems
