

8-Series: Pallet Shuttle Systems

A complete range of automation components for dual shuttle systems or FMS type installations

Made In The USA

Pallet sizes: 400mm x 400mm to 4000mm x 4000mm (15.74 x 15.74 to 157x157 inches) are standard

The Rusach Advantages

General

A proven & tested modular system for individual pallet changer designs, manufacturing cells and FMS Systems. Equally suitable for new machines as well as the upgrading of existing installations.

Application

Suitable for all machines on the market including vertical turning machines, measuring machines, as well as individual solutions for pallet changers and manufacturing cells.

Construction

All units in this modular system are produced from high quality materials and workmanship. The drive, switch and control elements are quality-approved articles for performance confidence. Installations incorporate a self contained hydraulic system where required.

Pallets

Can be furnished according to DIN, ISO or factory Standards. Other manufacturers pallets can also be transported.

Control

Systems are provided with basic controls to facilitate pallet changes. Cell scheduler and cell controllers are also available. Systems are supplied to customer requirements or with suitable interface to suit existing system and OEM requirements.

Installation/Commissioning

Systems are supplied with necessary foundation hardware. Our skilled personnel will commission the installation or provide turnkey solutions if required.

RUSACH INTERNATIONAL

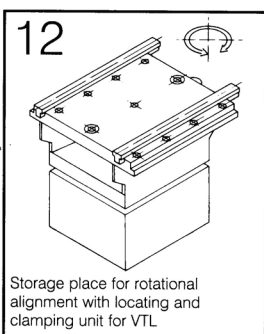

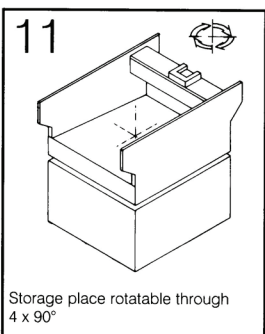

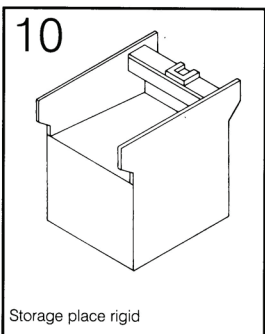

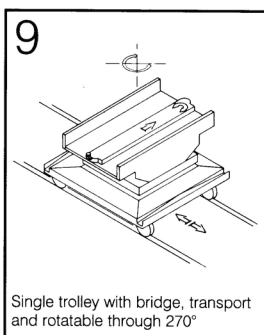

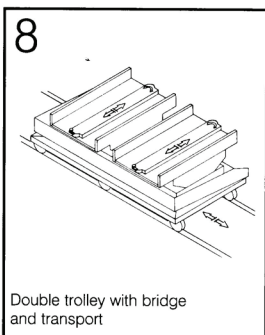

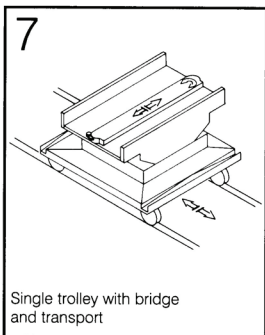

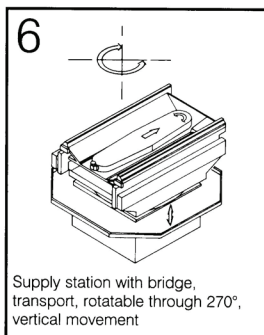

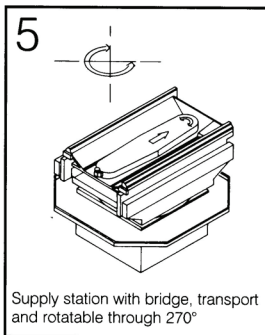

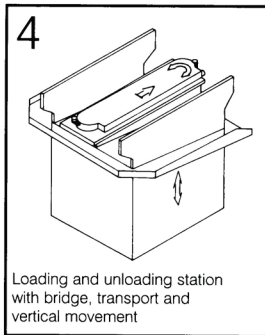

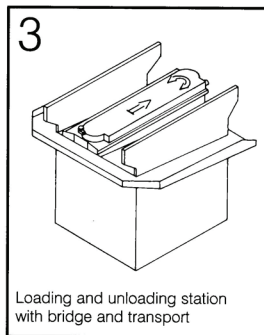

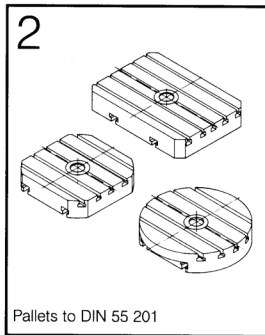

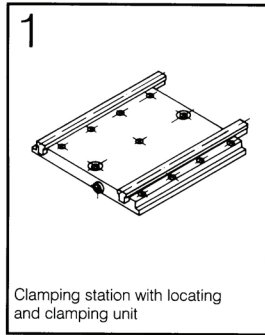

Every Challenge Has A Solution

8-Series: Pallet Shuttle Systems

Modular System Components

Available Options

- Hand scraped pallet top surface
