

# Rusach International 8-Series: Pallet Storage Systems

## The Rusach Advantages

**Rusach International** engineers are experts in pallet shuttle systems, flexible manufacturing systems and pallet storage systems, whether you need a load/unload system, a shuttle system, a flexible manufacturing system, a storage system, or a combination. **Rusach International** experts will evaluate your needs and design a system for you. We can incorporate a part setup station, a QC station, a part flip station or a part orientation station flowing to and from your machines, to keep them working and making parts, not sitting idle while parts are being setup or inspected.

Made in the USA
